

FOSTACARE SCALP TONIC

Users with the problem of over-irritated scalp, or in extreme cases neurodermatitis, on hair-covered areas cannot use the typical creamy care products.

This non-greasy, skin-soothing special hair lotion was developed for precisely this problem, which, in addition to considerably reducing itching, enables the scalp to be soothed by means of targeted intervention on the skin flora.

From experience, we recommend using only FOSTACARE SHAMPOO in combination, as otherwise the positive effects could disappear after washing the head.

Free from chemicals, crude oils and heavy metals.

Energized with the FOSTAC® technology.

Ingredients: Aqua purificata, Isopropylalcohol (natural), Betula Alba Bark Specialextract, Camelia sinensis Specialextract, Calendula Officinalis Specialextract, Chamomilla Recutita Specialextract, Olea Europaea Oil, Salix Bark Specialextract
