

SPHERE 125

The **SPHERE 125** creates an energy field and fills the room with light energy. It is suited for the harmonization of various interference fields in living and working rooms.

Used in combination with the Y-PRISM, it harmonizes common geopathic interference fields (earth rays, Water veins etc.) with the exception of electrosmog.

For stronger interference zones (e.g. cumulations etc), additional products may be required.

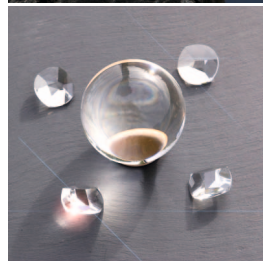

Application notes:

Using 4 Y-PRISM, the distance from SPHERE 125 to Y-PRISM should not exceed 12.5 m.

For high electromagnetic pollution or directional beam loads, we recommend the additional use of a SANA LEA OMNI-GOLD or OCTARION/OCTARINO and for all wireless devices the FOSTAC OMNI CHIP or the ELECTRIC plate (Mini, A6 or A5). The negative effects of the internal power network can be harmonized with ELECTRIC plates (A6, A5 or A4).

The personal sensitivity of the user is decisive when selecting the product. Our consultants are happy to assist you.

WARNING: Risk of fire in case of exposure to direct sunlight!

TECHNICAL DETAILS

Material: Glass

Size: Ø 125 mm
